

# Cristiano Koxne

COMPUTER ENGINEER | FULL-STACK DEVELOPER | AI, INTEGRATIONS AND AUTOMATION

Pato Branco, Parana, Brazil | cristiano\_koxne@outlook.com | linkedin.com/in/cristiano-koxne-8866511b9 | github.com/cristianokoxne

## Professional summary

Software Engineer with 6+ years of experience building, integrating, and deploying systems. Works across Node.js, TypeScript, Python, React, AWS, microservices, DevOps, and process automation. Experienced in delivering scalable platforms, REST and GraphQL integrations, context-aware AI agents, RAG workflows, and data-driven operations.

## Technical skills

|                          |                                                                                          |
|--------------------------|------------------------------------------------------------------------------------------|
| Languages                | JavaScript, TypeScript, Python, C, Rust, HTML, CSS                                       |
| Backend and architecture | Node.js, Express.js, Next.js, microservices, REST APIs, GraphQL, API Gateway, serverless |
| Frontend and mobile      | React.js, React Native, Expo, Angular, Chart.js                                          |
| Data and cloud           | PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Prisma, AWS Lambda, EC2, Docker, Kubernetes |
| AI and quality           | LLMs, RAG, OpenRouter, AI agents, unit testing, integration testing, UAT, CI/CD          |

## Professional experience

- Aug 2026 - Sep 2026

**Freelance Full-Stack Developer - Neria Notifications System**

  - Designed and implemented scheduled notifications with an administrative calendar, scheduling APIs, and audience segmentation.
  - Built a Node.js/TypeScript worker for daily idempotent delivery, Android push via Expo/Firebase, token management, batch sends, receipt tracking, and invalid-token handling.
  - Integrated customer segmentation with Ploomes and WhatsApp message delivery through webhooks.
- Mar 2026 - Apr 2026

**Freelance Full-Stack Mobile Developer - Neria**

  - Developed a video onboarding and training journey for React Native/Expo across Android, iOS, and web, with YouTube, playback resume, progress tracking, and sequential module unlocks.
  - Built APIs and business rules in Next.js/TypeScript with progress persistence, contract-type access control, and Prisma/PostgreSQL integration.
- Nov 2024 - Dec 2024

**Consultant - SincroSoftware**

  - Led the migration of a monolithic Node.js application to microservices, mapping service boundaries and decoupling critical business flows.
  - Containerized services with Docker and integrated an LLM recommendation engine using RAG strategies for more personalized recommendations.
  - Supported the transition with iterative validation, reducing migration risk while keeping application delivery continuous.
- Sep 2024 - Dec 2024

**Freelance Developer - Cronus Saude**

  - Architected cashback and loyalty microservices using React.js, API Gateway, PostgreSQL, and Stripe, with secure and scalable financial flows.
  - Developed the integration layer between payments, loyalty, and customer data for reliable transaction processing and traceability.
  - Built a React and Chart.js administrative dashboard for real-time reports and performance visibility.
- Mar 2023 - Present

**Back-End Developer - Integrat Tecnologia**

  - Gathered requirements and defined context scopes for specialist AI agents with cross-functional teams.
  - Designed and containerized Node.js and Python middleware deployed on AWS Lambda and EC2 through Docker.
  - Integrated Salesforce, RD Station, LegalOne, Wazuh, Pipedrive, and DeskManager through REST and GraphQL; orchestrated 10+ pipelines, cutting manual work by up to 60% and turnaround time by 50%.
  - Configured agents for document classification and alert triage with unit, integration, and UAT coverage.
- Jul 2023 - Nov 2023

**Consultant - Wonder Park Foz**

  - Deployed an event ticketing platform on EC2 and configured Docker, Nginx, and PM2.
  - Implemented monitoring and alerting, reducing downtime by 40%.

**May 2022 - May 2023      Software Developer - PapersBR Tecnologia**

- Architected AI chatbot solutions with microservices and dynamic NLP flows in Node.js, JavaScript, and Python.
- Designed scalable bots and enhanced CRM, ticketing, and telemetry through REST/GraphQL; automated deployments with Docker and achieved 98% UAT approval.

**Nov 2022 - Mar 2023      Front-End Developer - OCCAM Engenharia**

- Built responsive, SEO-optimized applications with Next.js, React.js, Angular, and AWS.
- Managed CI/CD pipelines and automated deployments, ensuring 99.9% uptime.

**Jan 2017 - Jan 2018      Soldier - Brazilian Army**

- Planned and published military magazines and received a Certificate of Merit for exceptional service.

## Selected projects

**Gym Wave** - A modular platform for gyms covering students, facial access, training, finance, automation, and operational intelligence.

**Wake Up Bro** - A browser face-detection experiment that launches motivational videos; a laboratory for AI-assisted development using free models.

**UsaAi, Fast Sheet API, and OmniBridge** - Digital products for WhatsApp integration, spreadsheet-data publishing through APIs, and bio pages with links and metrics.

## Education and languages

**Mar 2018 - Aug 2023**      B.S. in Computer Engineering - UTFPR, Pato Branco, Brazil

**Jan 2014 - Nov 2016**      High school with an emphasis in IT - Colegio Estadual Rio do Iguacu, Brazil

**Languages**      Native Portuguese | Upper-intermediate English
